

Hargreaves Premier rainwater systems are available in a choice of 3 different finishes, Premier grey primed, Premier Extra black gloss or Premier Extra coloured.

Most Premier standard rainwater products are now available in Premier Extra black gloss finish from stock and due to our recently upgraded painting facility we are able to produce an industry leading finish with the flexibility to complete any bespoke project on time.

Premier Extra coloured offers rainwater fittings supplied pre-painted to match any RAL or BS colour reference, we are also able to offer a Colour Match service taken from an existing sample.

Premier Extra systems provide the following additional benefits:

- Quicker installation and reduced costs; can reduce installation time by up to 50%.
- No requirement for hazardous material on site and minimal down time caused by inclement weather conditions delaying painting.
- Factory applied two-pack epoxy coated finish has a life expectancy of 10 – 15 years (inland areas).
- Delivered protectively wrapped for protection in transit and on site.

Hunsham Stables, Tiverton

Premier Extra Coloured products are painted to order and priced on application. Quotes will be provided using Premier Extra Black Gloss codes and prices with a separate surcharge to account for the specified paint required and the special use of painting facilities.

All we need from you:

- RAL or BS colour reference or sample for colour matching
- Specification for finish: gloss/ matt/ semi-gloss (% gloss required)
 - Full list of products to be painted
